Darcor's ergonomic logo symbolizes work - efficient, worker - friendly casters. Darcor is the standard for ergonomically designed casters.

SPECIALTY CASTERS: *SEE PAGES 36-47.

DELRIN™ IS A REGISTERED TRADEMARK OF DUPONT COMPANY.

HOW TO SELECT THE PERFECT CASTER & WHEEL

Darcor offers you a wide variety of caster types and wheel options – and for good reason. Choosing the correct caster for the job and the work environment dramatically increases the life and performance of the caster – as well as enhancing its ergonomic benefits.

Here's how to select the perfect Darcor caster for your needs.

LOAD CAPACITY

This is your most important criterion for caster choice. In general, each caster should have the capacity to support one-third of the total load weight. That is because overloading, uneven floors and/or uneven load distribution may place a heavier burden on one or more casters.

To determine the required caster load capacity add the weight of the load and the weight of the cart, then divide by three.

MAXIMUM MOBILITY

The larger the wheel size (and swivel radius), the greater the mobility. The type of bearing selected will also further improve mobility and reduce rolling resistance.

Darcor's Neoprene, Super Roll Neoprene, Solid Elastomer, and Polyurethane offer maximum mobility in any application they are required for.

Your choice should be dictated by conditions in the work environment.

TREAD MATERIALS AND CASTER TYPES

Floor Conditions – Check for rough or uneven surfaces – joints, grates, potholes – oil, grease or chemicals, and note any carpeted areas.

Darcor Neoprene (D & SR) wheels are recommended for all types of floor conditions up to a load capacity of 600 lbs. per caster. For moderate to heavy loads, our Solid Elastomer (SE) wheels are an excellent choice. And for the heaviest loads, choose Polyurethane or Steel wheels.

Environmental Conditions – Check for dust, humidity and temperature extremes. Are the floors littered with debris or metal scraps?

Darcor Cart Washable Casters are ideal in areas with sprays or wash down requirements. The sealed swivels and rust-inhibiting finish add extra life. Sealed swivels are also a good idea where there is grinding action, lint or dust. They are also quiet – a consideration in hospitals.

APPLICATION CONSIDERATIONS

Check the speed of your operation. Are you using tow-line vehicles or Automatic Guided Vehicles (AGVs)? Most casters are rated for “walking speed”. Higher speed applications decrease their load capacity and can increase heat build-up.

Darcor Solid Elastomer (SE) wheels are a perfect “high speed” choice. In continuous use, they don't build up heat, are easy to maneuver with less effort and, because of their exceptionally low rolling resistance, actually extend the “in-use” time for battery powered vehicles.

Darcor

ergonomic casters

ISO 9001

REGISTERED

DARCOR CASTERS ARE ENGINEERED AND MANUFACTURED TO STRINGENT STANDARDS FOR STRENGTH, RELIABILITY AND EXTENDED LIFE.

TOUGH...

Tough conditions are a way of life for Darcor Detryl™ 'SE' and Neoprene 'D' and 'SR' Super Roll Wheels and Casters. These exceptional casters are designed to survive the harshest environments and operating conditions. They have proved their worth in thousands of miles of use, over years of service in applications worldwide. Darcor wheels stay in shape, protect floors and always swivel and roll freely. They can greatly **reduce back strain**.

SMOOTH...

Our sealed precision ball bearings and highly resilient, durable tread materials provide quiet, silky smooth mobility with very long life. It takes so little force to move an 'SE' wheel that one person can easily manoeuvre a 1200 kg load. The silent and smooth rolling 'D' and 'SR' wheels have an extraordinary ability to **roll over obstacles** and floor litter (**glass, metal cuttings, plastic resin pellets**) without stopping or jarring the cart or embedding in the tread. Darcor Casters are the perfect problem solvers.

WHEEL MATERIALS

W-76-XD

NEOPRENE
TREAD SYMBOL "D"
DUROMETER - SHORE 62 A
 Superior for all floor surfaces and ergonomically designed for excellent mobility and resistance to wear. These quiet and easy rolling wheels are very shock absorbing, non-marking and will reject floor debris, roll over screws, metal or glass fragments, resin pellets and are non-staining. Darcor "VQ" very quiet ball bearings are standard in the 20 through 70 series. Precision ball bearings "P" are recommended in the 400 series. Sizes available 2" to 8".

W-406-PSE

SOLID ELASTOMER
TREAD SYMBOL "SE"
DUROMETER - SHORE 56 D
 The solid Elastomer Wheel has set a new standard of performance for all applications where exceptional mobility is required. Ergonomically designed for medium loads (300 to 1800 pounds per wheel) the "SE" wheel is recommended for continuous use and "TOW LINES". It is also tolerant of a wide range of chemicals and is quiet, durable, shock-absorbing. For the ultimate mobility precision "P" bearings are recommended. The broad temperature range encourages use in freezers where ordinary wheels will seize and become immovable. The "SE" wheel is a real "BACK SAVER"

W-76-XSR

NEOPRENE
TREAD SYMBOL "SR"
DUROMETER - SHORE 62 A
 These wheels offer the same high quality as "D" wheels but with a low profile tread for easier swivelling and mobility.

POLYURETHANE
TREAD SYMBOL "U"
DUROMETER 95 A
 Recommended for heavy loads and rough floors. Shock-absorbing. When fitted with tapered bearings, improves life and mobility.

W-75-H

HARD RUBBER
TREAD SYMBOL "H"
DUROMETER 78 "D"
Extremely tough,
hard synthetic rubber material.
Good for smooth,
clean floors.

W-75-K

RUBBER
TREAD SYMBOL "K"
DUROMETER 85 "A"
Semi-resilient rubber.
A tough robust wheel.

W-406-TCI

SEMI-STEEL
TREAD SYMBOL "CI"
CAST IRON
Semi-steel castings are
good for heavy-duty,
smooth, clean floor
applications.
All wheels are crowned to
prevent floor damage.
Good for high temperature
applications.

W-3116-YPN

PNEUMATIC
TREAD SYMBOL "PN"
AIR FILLED TIRE
Fully pneumatic
with separate inner
tube and wheel
discs of heavy
gauge metal.
Good for rough
floors and outdoor
conditions where
cushion is required.

W-908-TN

INDUSTRIAL RUBBER
TREAD SYMBOL "N"
DUROMETER 70 "A"
Aluminum core wheel
with black natural
rubber tread bonded
to core. Provides
shock-absorbing
cushion. Used in heavy
duty applications.

W-405-TCV

V-GROOVE
TREAD SYMBOL "CV"
CAST IRON
Economic handling
of heavy loads.
Adaptable (Will roll on
Track and Floor).
Free rolling on sediment
covered floors as the
Angle Track is self
cleaning.

ACCESSORIES

BRAKES - SWIVEL LOCKS - SWIVEL SEALS - THREAD GUARDS

12-24B-XD

20 SERIES
Side brake.
Hardened spring.
Steel brake pad for optimum
braking on light loads.

OU125-BC5B2-XSR

HOSPITAL BED BRAKE
Locks swivel and wheel.
Easy access lever can be
engaged from any position.

16-65B-XD

60-70 SERIES
PIT BULL BRAKE
Specially designed metal pad
riveted to the brake spring for
use with Neoprene wheels.

6-908B-TU

700 - 900 SERIES
DISC BRAKE.
Automotive brake pad materi-
al offers superior grip for
heavy loads.

SWIVEL SEALS
OPTIONAL 60-70 SERIES
STANDARD 400-800 SERIES.
Protects swivel from dirt,
moisture and foreign material.

CENTRAL LOCKING SYSTEM
Available on twin-wheel
M5 & M6 series.
3 positions - free swivel,
swivel lock and total lock.

TWI-CL1006

60-70 SERIES
Wheel brake rubber pad
riveted to spring steel
engages against face of
wheel.

31-75B-PSE

400-800 SERIES
Cam action brake and swivel
lock. Thick spring steel pad
grips both the wheel and
swivel.

31-406B-TD

SWIVEL LOCKS
Available from 40 series up.
Foot operated for easy
activation.

31-76F-XD

THREAD GUARDS
Standard on carpet masters
through 400 series wheels.
Protects against thread wrap
up in axles and bearings.

BEARINGS

PRECISION SEALED BALL BEARING
DESIGNATION "P"
 Offers least rolling resistance. Never requires lubrication. For medium loads, side thrust and high speeds.
 *blue dot on yoke

MACHINED V. Q. (VERY QUIET) BALL BEARING
DESIGNATION "X"
 Balls roll in a machined steel, case hardened raceway for least resistance. Slots allow grease into raceway.
 *red dot on yoke

TAPERED ROLLER BEARING
DESIGNATION "Y"
 For heavy loads, side thrust and high speeds.

ROLLER BEARING. SPLIT SLEEVE OR DRAWN CUP
DESIGNATION "T"
 Rollers turn on a hardened steel spanner bushing.
 *green dot on yoke

DELRIN™ BEARING
DESIGNATION "M"
 A strong bearing material that resists corrosion. Ideal in wet applications. Requires lubrication.

SLEEVE BEARING (BUSHING)
 No designation. Case hardened steel. An inexpensive bearing for lighter loads.

* DELRIN is a registered trademark of the DuPont Co.

AXLES

PLAIN AXLE
 Standard in 20 series and all casters with sealed precision bearings. Also heavy duty series casters with grease fittings in wheel.

SELF TAPPING ALLEN HEAD AXLE.
 Used with E2 and Carpet Master. Eliminates unsightly nut. Prevents wear on shoes and nylon runs.

CROSS DRILLED AXLE
 Standard on 60 and 70 series casters. Axle is drilled through center. Allows grease to flow into the bearing.

GREASE FITTING IN AXLE
 Standard on 400 series optional 60 and 70 series. Cross drilled axle with zerk fitting in end. Fits standard grease guns.

APPLICATIONS

At Darcor, we understand that every workplace is different, yet many share certain common requirements. We have set the pace of innovation by establishing industry application standards on four continents.

shock & vibration

materials handling

laundry

office applications

medical diagnostic

textile applications

In all of these application areas, Darcor remains successful by producing casters that feature ergonomic design, value, quality, flexibility, durability and performance.

DARCOR IS THE STANDARD BY WHICH ALL OTHER CASTERS ARE MEASURED

That is a bold statement – and one we stand behind totally. Just ask our customers. Talk to the many specialty manufacturers who have come to us for unique solutions to their caster needs. Speak with the international names in business and industry who have chosen Darcor casters to make their operations run more smoothly, more efficiently.

- What each of them will tell you is this: Darcor casters set the quality standards for the industry; Darcor is unmatched in its ability to deliver the perfect caster for specific applications. • We are aware our reputation rests on every caster we produce. That is why we maintain complete control over every aspect of their production in our own multifaceted manufacturing plant, featuring state-of-the-art in-house facilities and an expert, dedicated workforce.
- In this catalogue, you will find a complete range of the casters and wheels most frequently used by organizations like yours. You will also find something else: Casters and wheels which represent breakthrough advances that will markedly improve the function of your operations over the long term. • Research and development is one of our strengths. It allows us to actually anticipate the need for new types of casters in today's rapidly evolving manufacturing environment. We are able to respond with uniquely

designed products that blend ergonomic principles and advanced materials to improve bottom-line results and workplace conditions. • As a result, we have had more than our share of innovations so revolutionary they have redefined the function of casters in the workplace. Among those revolutionary innovations are the Neoprene wheel and the Solid Elastomer (SE) wheel. Check the specifications for these remarkable wheels and you will be amazed at their versatility and practicality. • When you choose a Darcor caster, you can rest easy, secure in the knowledge you have chosen the best. • We design to achieve a perfect match between need and caster. We engineer for strength, reliability and extended life. And we manufacture our casters under rigid controls that guarantee maximum long-life performance. • To ensure their integrity, we subject our casters to destruction tests under unbelievably hostile conditions. The trouble is, our casters are so good they sometimes wear out the test machinery before they wear out themselves. • So, while Darcor casters may have a higher initial price than others, they are actually the lowest-cost casters you can buy – because they are made to last.

- Remember our promise: Anything that moves will move better on a Darcor Caster. It's a promise you can profit from.

TOP PLATES - STANDARD AND OPTIONAL

Over the years, Darcor has manufactured many different sizes of top plates to eliminate problems when changing casters. These top plates are shown as options. Darcor can manufacture other top plates as required, provided the bolt hole centers do not interfere with the swivel raceway. Their cost is based on size and quantity.

TOP PLATE NUMBER	OVERALL SIZE		BOLT HOLE CENTERS (SEE DIAGRAMS)				MOUNTING BOLT SIZE	STANDARD ON SERIES	* OPTIONAL ON SERIES
	WIDTH	LENGTH	WIDTH	LENGTH	WIDTH	LENGTH

TUBING AND PIPE SIZES

Due to the large quantity of tubing sizes available, we have endeavoured over the years to manufacture stems to fit most standard sizes of tubing. We do not feel that expanding stems are the proper solution to these problems, as they have a tendency to wear and become loose. Our stems are equipped with a grip ring made from hardened spring steel to eliminate wear. Most of these can be installed at no extra charge where they apply to the series of caster. Please check optional fitting pages, for available sizes.

STANDARD IRON PIPE SIZES:

TUBING SIZE	"O" STEM SIZE REQUIRED
1" 16 GA Square Tubing	7/8 x 2
1" 16 GA Round Tubing	.862 x 1-1/2
1" 18 GA Round Tubing	.895 x 1-1/2
1-5/8" 16 GA Round Tubing	1.480 x 2-1/2
1-5/8" 16 GA Round Tubing	CS 158 Socket (5/8 x 1-5/8 Stem)
1-1/4" 14 GA Square Tubing	CS 125 Socket (5/8 x 1-5/8 Stem)
1-1/2" 18 GA Square Tubing	CS 150 Socket (5/8 x 1-5/8 Stem)

PIPE SIZE	INSIDE DIAMETER (DECIMAL) (FRACTION)	OUTSIDE DIAMETER
3/8"	.493 31/64"	.675
1/2"	.622 5/8"	.840
3/4"	.824 53/64"	1.050
1"	1.049 1-3/64"	1.315
1-1/4"	1.380 1-3/8"	1.660
1-1/2"	1.610 1-39/64"	1.900

OFFICE CHAIR CASTERS

Office Chair Casters by Darcor have earned a distinguished reputation for quality, based on years of consistently high performance and durability.

Their product stature is attributed to Darcor's dedication to meticulous research, design, engineering and testing. Widely used on office chairs, they are equally useful for many institutional applications including IV poles, overbed tables, nightstands and many other uses.

Darcor's innovative designs not only reduce wear and tear on the mechanism of chairs but increase the user's physical efficiency and comfort by reducing the strain of moving the chair during daily chores at workstations. Darcor's designs eliminate the frustrating experience of shoving and ploughing office chairs through carpets and over warped plastic mats.

The Carpet Master™ for carpeted floors, and the Eternity II for tile and linoleum floors - are synonymous with comfort. They have the qualities desired in a superior product, such as reliability, durability and unparalleled ease of movement. Both the Carpet Master™ and Eternity II incorporate the legendary Darcor double ball bearing swivel design, with two ball bearing races of equal diameter.

This ingenious design eliminates any possibility of binding, sticking, or sliding.

THE CARPET MASTER™

OC-53-XD

The Carpet Master rolls and swivels effortlessly, eliminating the need for unsightly and hazardous plastic mats. The silent, donut neoprene wheel with its soft resilient texture, rolls smoothly and quietly on all floor surfaces from carpet to quarry tile. The large swivel off-set and soft wheel reduces the stress on carpet fibers thus greatly extending carpet life. Carpet Master's are available in standard chrome and black matte finish. Also available with bright brass and brushed brass finish.

FEATURES

- 5/16" Axle
- 7/16" Rivet
- Double row ball bearing swivel, both raceways equal diameter. Ball bearings standard in wheel.
- Specially designed removable axle eliminates unsightly nut
- All swivel parts are case hardened
- Thread guards standard

ETERNITY II

OC-E2-XD

The Eternity II is recommended for all types of hard floors. The neoprene wheel will not mark or stain tile and has a remarkable inter-floor capability. Darcor casters are available with optional fittings, including top plates, stems and sockets. Eternity II has a standard chrome or black matte finish and is also available with a bright brass finish.

FEATURES

- 5/16" Axle
- 11/32" Rivet
- Double row ball bearing swivel, both raceways equal diameter. Ball bearings standard in wheel.
- Specially designed removable axle eliminates unsightly nut
- All swivel parts are case hardened

OPTIONAL TOP PLATES AND STEMS ARE AVAILABLE. SEE PAGES 14, 15, 16.

DELIRIN™ BEARINGS AVAILABLE IN NEOPRENE (D) AND SOLID ELASTOMER "SE" WHEELS. SUBSTITUTE LETTER "M" FOR LETTER "P"

800 SERIES

CAPACITY: 1350-1800 LBS PER CASTER

8-808-TU

8-808R-TCI

8-810F-PSE

FEATURES

- 3/4" Axle
- 1" King bolt
- Double row ball bearing swivel
- Both raceways equal diameter
- Standard with swivel seals and grease fittings in swivel and axle
- Bright zinc finish
- All swivel parts case hardened to Rockwell 62C

OPTIONS

- Brakes, locks wheel and swivel. Available on 6", 8" and 10" models. Add letter "B".
- Four position swivel locks. Add letter "F".
- Brakes and swivel locks cannot be combined on the same caster.

INSTALLATIONS

* Ergonomically designed for easy rolling.

700 SERIES

CAPACITY: 1350-2200 LBS. PER CASTER

6-708-TU

6-708R-TU

FEATURES

- 3/4" Axle
- 7/8" Grade 8 King bolt
- Double row ball bearing swivel
- Grease fittings in swivel and axle
- Bright zinc finish
- All swivel parts case hardened to Rockwell 62C

OPTIONS

- Brakes available. Add letter "B".
- Four Position Swivel locks. Add letter "F"
- Brakes and swivel locks cannot be combined on the same caster.

INSTALLATION

NO. 6 TOP PLATE

5200 SERIES / TWIN WHEEL

CAPACITY: 1400 - 10000 LBS. PER CASTER

5-5210-TCI

5-5210R-TCI

FEATURES

- 1" Axle
- 1 - 1/4" King bolt
- Dual wheel construction for easier swiveling
- Precision machined swivel head equipped with tapered bearings
- Grease fittings in swivel and wheel

OPTIONS

- Brakes available. Add letter "B".
- Swivel locks available. Add letter "F".

INSTALLATION

PNEUMATIC CASTERS

CAPACITY: 300 - 2700 LBS. PER CASTER

6-310-TPN

6-3218-YPN

52-3318FP-YPN

FEATURES

300 Series

- Manufactured with the same swivel construction as the 700 series
- 4 Ply wheels equipped with roller bearings
- Grease fittings in swivel and wheel for easy lubrication

31,32, 3300 Series

- Heavy duty swivel equipped with tapered roller bearings
- King pin threaded, and welded to plate for extra strength
- 4 Ply tires rated for 5 M.P.H.
- Tapered roller bearings in wheels, supported by protective seals
- Grease fittings in wheel and swivel

OPTIONS

- Available with swivel locks
- Wheels may be polyurethane filled to eliminate flats

V-GROOVE CASTERS

CAPACITY: 300 - 2000 LBS. PER CASTER

FEATURES

- High quality semi-steel wheels, machined to close tolerances
- Economical handling of heavy loads
- Floor protection
- Adaptability, (will roll on track or floor)
- Free rolling on sediment covered floors as the angle iron track is self cleaning

OPTIONS AND INSTALLATIONS

See proper series page of model selected for available options, and pages 15, 16 and 17 for available installations.

SPRING LOADED CASTERS

31-SL 400 SERIES

31-SL404-PSE

SPRING LOADED CASTERS

FEATURES

- Oil impregnated permanently lubricated sintered bearings for all moving parts
- Sealed precision ball bearings in the wheel permanently lubricated for long life and low rolling resistance
- Sealed swivel assembly with grease fitting for ease of access
- Load rating 1000 pounds at maximum spring deflection
- Various Mounting plates available

Available in 3", 4", 5", 6", and 8" models

INSTALLATIONS

NO. 31 TOP PLATE

LIFT TRUCK APPLICATIONS

FEATURES

Darcor offers a unique line of Spring Loaded Casters for lift trucks. Ergonomically designed, these easy to maneuver casters offer the utmost in superior performance. Darcor "SE" Solid Elastomer Wheels are chemical resistant and show minimal wear or heat buildup in extended use. Spring Loaded Casters equipped with SE wheels feature precision sealed ball bearings and require little maintenance. Darcor also supplies "high quality" Polyurethane wheels with tapered bearings for heavier loads and varying speed conditions.

SPECIAL APPLICATION CASTERS

FEATURES

The following are just a few of our special application casters. They have been designed to meet specific requirements of customers by our engineering department. These applications are found in many different areas of industry so we feel it is important to show these casters in their own section of our catalogue. We hope they will offer you a solution to your own unusual or special application problems. We encourage you to call us if you don't find the caster you require in our catalogue.

8216-YU

16,800 lbs. capacity caster with twin 16" x 5" polyurethane wheels. Extra heavy assembly designed to withstand extreme thrust on king pin. Presently being used in the mining industry OH 21-3/4".

9K

20,000 lbs. capacity steel wheel caster with an overall height of just 1/2". This caster was designed to move a large heavy load in a confined area where overall height was restricted. Available in swivel and rigid models, it can be supplied in larger sizes as well.

TURTLE

"Turtle" Caster designed for load ratings from 600 lbs. to 2,500 lbs. Equipped with 3 swivel casters mounted to a swivel head. Good for low heights and heavy loads. Reduced swivel effort gives a smooth gliding action while protecting floor surfaces. Excellent choice for applications such as studio, theatre and stage equipment.

31-224-XD

300 lbs. twin wheel caster available with either 3" or 4" diameter wheels and can be supplied with any fittings applicable to the 70 series. The twin wheels offer easier swiveling and are ideal for equipment going on and off elevators where single wheel casters tend to get caught in the entrance.

31-274-PSE

Twin wheel caster, equipped with solid elastomer sealed precision ball bearing wheels. Twin wheels maintain a low profile while providing easy pivoting action. Good for heavy loads, offering ease of movement over floor gaps and joints. Excellent for continuous use operations such as tow lines, and Automatic Guided Vehicles.

8-2404-PSE

CARTWASHABLE™ CASTERS

CAPACITY: 225-1000 LBS. PER CASTER

31-CW76-XD

31-CW76B-XD

31-CW76R-XD

31-CW76F-XSR

FEATURES

After years of actual experiments and hundreds of tests, we have developed a line of casters to reduce rusting under wet conditions. Hospital laundries and dietary departments, plus hotel and motel areas concerned with sanitary operations will find the cartwashable design reduces maintenance and provides extra life both to the casters and equipment. The medium and heavy duty models are ideally suited to the sanitary conditions dictated by experimental and pharmaceutical laboratories as well as firms connected to the meat packing and food industries.

MEDICAL APPLICATIONS

Darcor manufactures a complete line of ergonomically designed casters for medical and diagnostic equipment such as portable x-ray machines, MRI's and ultrasound machines. Darcor's twin wheel casters – featuring directional locks, brakes and central locking systems – are available with either LE or Neoprene wheels, which are quiet, non-marking and shock absorbent. Darcor is proud to manufacture a complete line of products that exceed current medical industry standards.

M6 SERIES

The Darcor M6 incorporates an advanced caster design and central locking mechanism that makes it an excellent choice for transporting the most sensitive diagnostic equipment. It can be custom-configured to meet the customer's precise specifications.

M5 SERIES

The robust, twin-wheel design of the M5 caster makes it ideal for applications, such as bariatric beds, where strength and maneuverability are critical. Equipped with shock-dampening wheels to cushion its load, the M5 is widely used in health-care facilities around the world.

CENTRAL LOCK STEM

HOSPITAL BED CASTER

LOCKS SWIVEL AND WHEEL

FEATURES

Our brake and swivel locking bed caster is the first North American design of this type. Designed with a cam action locking mechanism, the lever easily engages and disengages with the touch of a toe. As well as offering easy access, the lever design keeps it within the swivel radius of the caster, eliminating any interference. The assembly is available with nickel chrome finish (BC5) or zinc finish (BC65) and equipped with our non-marking Super Roll neoprene wheel complete with ball bearings.

- B2 brake casters available on BC64 and BC65 casters with additional charge.
- All bed casters shown with OU 5/8" x 1-5/8" grip ring stem, optional stems and sockets as shown. Also available with all 60 series stems and top plates see pages 14,15 and 16.
- * Stems should be secured on brake casters to prevent turning when swivel lock is engaged.
- * Ergonomically designed for easy rolling.

HOSPITAL CASTERS

Darcor has been supplying casters to hospitals for over 60 years and has become recognized as the leading authority for solving replacement caster problems. We have been involved in both new and existing applications for major hospitals in cities all over North America.

We recommend our specially formulated neoprene wheel for most applications found in hospitals. It is very quiet, extremely easy to roll over all surfaces including carpet and quarry tile, resists chemicals and cleaning compounds common to the hospital environment, and is **GUARANTEED NON MARKING AND NON STAINING**

For heavier loads, the **SOLID ELASTOMER** wheel is an ideal solution. On the following pages (45, 46, 47), we will identify some of the more common applications, and the casters we recommend for them. As well, we elaborated (pages 41, 42, 44) on bed casters, and wash down applications with casters specifically designed for these and other problem areas in hospitals.

NEOPRENE WHEELS - SUPER ROLL NEOPRENE WHEELS

TREAD SYMBOL "D"

W-76-XD

NEOPRENE
TREAD SYMBOL "D"
DUROMETER - SHORE 62 "A"

Superior for all floor surfaces and ergonomically designed for excellent mobility and resistance to wear. These quiet and easy rolling wheels are very shock absorbing, non-marking and will reject floor debris, roll over screws, metal or glass fragments, resin pellets and are non-staining. Darcor "VQ" very quiet ball bearings are standard in the 20 through 70 series. Precision ball bearings "P" are recommended in the 400 series. Sizes available 2" to 8".

TREAD SYMBOL "SR"

W-76-XSR

NEOPRENE
TREAD SYMBOL "SR"
DUROMETER - SHORE 62 "A"

The "SR" wheels offer the same high quality as "D" wheels but with a low profile tread for easier swiveling and very low rolling resistance.

- Shore Hardness 59-63 "A" Scale
- Non marking and non staining
- Temperature ranges 300° F for 20 minutes, 175° F for 1 hour
- Highly resistant to wax, oils, greases, cleaning compounds, weather and ozone.
- Can be used on all floor surfaces
- Does not flat spot when sitting for long periods under load

* All Darcor "D" and "SR" wheels are mold-on wheels with a neoprene tread thermally bonded to a glass fibre reinforced nylon core for exceptional strength, impact resistance and outstanding rollability.

NEOPRENE WHEEL CHEMICAL RESISTANCE GUIDE

This table lists a broad range of fluids and chemicals which are considered compatible with our Neoprene wheel. Ratings are at 72°F unless specified otherwise. Concentrations of aqueous solutions are saturated, except where noted. Note especially that this data is based on laboratory tests and may vary in practice. Field testing is suggested to confirm these recommendations. Only those chemicals that have little or no effect on the Neoprene wheel are listed here. Other fluids may have a very minor or major effect. For information on the compatibility of other fluids contact engineering.

SOLID ELASTOMER WHEELS

TREAD SYMBOL "SE"

W-406-PSE

- Shore Hardness 55 + 1 "D" Scale
- Temperature Ranges -40°F to 230°F.
- Resistant to Wide Range of Chemicals.
- A must for tow line applications.
- Extraordinarily easy to push.
- Shows minimal wear in extended use.
- Shock absorbing and extremely quiet.
- Resists abrasion and many hazardous chemicals.
- Displays extremely low heat build-up in continuous use.
- No maintenance required for precision bearings.
- No flat spotting.

ROLLABILITY TESTS DARCOR "SE" VS THE COMPETITION

Tests were conducted using a platform truck equipped with two swivel and two rigid 6 x 2 casters loaded with a total of 2150 pounds (537 per caster). The effort required to start and maintain the truck in motion was measured. The swivelling test was conducted by aligning the two swivel casters at 90° to the direction of travel.

Each test was conducted three times and the results averaged. Variations of twenty percent were common. The greatest variation was experienced when the forces required were greater than eighty pounds due to the physical effort required. All tests were conducted manually with appropriate force gauges, and roller bearings in the wheel.

The ranking of the various wheels gave the greatest weight to starting and rolling. It was felt that swivelling could be affected by the shape of the tread and would not be as valid an indication of performance.

TEST RESULTS

RANK	MANUFACTURER & TYPE OF WHEEL	HARDNESS SHORE D	LOAD LBS	START LBS	ROLL LBS	SWIVEL LBS
#1	DARCOR Solid Wheel – SE	55 ^D	2150	16	11	65

DATRYL, as used in the "SE" WHEEL, is a proprietary blend of elastomers and other constituents to produce a wheel which we believe is superior in performance to conventional urethane, hard rubber and Phenolic wheels.

URETHANE WHEELS

TREAD SYMBOL "U"

W-406-TU

Shore Hardness: 95 "A" Scale
 A Urethane Tread moulded and bonded to a steel core. Recommended for heavy loads and rough floor conditions.
 Resistant to a wide range of chemicals, oils and solvents.
 Withstands temperature ranges from 25°F below 0 up to 200°F.
 Resists abrasion and flat spotting.

SEMI-STEEL WHEELS

TREAD SYMBOL "CI"

W-406-TCI

A Semi-Steel Casting of a close-grained high tensile iron. All Wheels are crowned to help prevent floor damage, and improve swiveling. Also available in "Grooved" type for inverted angle iron applications. See Page 36.

5000 Series - 1-1/4"

RUBBER WHEELS**TREAD SYMBOL "K"**

W-75-K

Shore Hardness: 85-90 "A" Scale.
Semi resilient rubber. A tough robust wheel.
Recommended for temperature ranges from 0°F to 110°F.

HARD RUBBER WHEELS**TREAD SYMBOL "H"**

W-75-H

An extremely durable synthetic rubber material formed under very high pressure.
Tremendous wearing characteristics.
Shore Hardness: 78 "D" Scale.
NOT affected by oil, grease, water, gas or cleaning compounds.
Non-Conductive.
Temperature range 110°F max. to -40°F.
Not recommended for use on tile.
Identification: Brown in colour.

INDUSTRIAL WHEELS**TREAD SYMBOL "N"**

W-908-TN

Aluminium core with roller bearing and protective outer seal.
 Black natural rubber tread bonded to core.
 Hardness - 70 Shore 'A'
 Tread resists chipping and abrasion as well as flat spotting.
 High quality natural rubber allows for ease in mobility.

Optional Bore sizes: 1", 1-1/4"

"1-1/4" Bore is not supplied with a hardened spanner bushing

PNEUMATIC WHEELS**TREAD SYMBOL "PN"**

W-3118-YPN

Fully Pneumatic with separate inner tube and wheel discs of heavy gauge metal.
 Polyurethane filling is available.
 Pneumatics do require inflation.
 Lubrication through nipple in hub.

NON-MARKING PROTECTIVE BUMPERS

PROTECTS WALLS AND EQUIPMENT

C-1676

C-1676 Corner Bumpers
Made especially for use with C-567 Strip Bumper to give a uniform continuous effect all around the equipment.

C-833

C-833 Corner Bumper
Made to give adequate protection to all surfaces that may be contacted, such as doors, door facings, walls, furniture, and other equipment. Easily attached by using self-tapping sheet metal screws.

C-813 Donut Bumpers
Commonly installed on the ends of tubular handles to give needed protection in manipulation of equipment .
Note: steel insert around mounting hole. Attached to wood with wood screws or to metal with rivets, bolts, or metal screws.

C-813

Model C-567 Strip Bumper
A flat based rubber strip bumper designed for installation on either metal or wood surfaces. This model is easily applied and does not require a special channel.

(MI-500- Flat Bar Metal Inserts 1/8" x 1/2" for C-567, ordered separately, subject to cutting charge).

C-567

FLOOR LOCKS

SECURES LOAD IN POSITION

634

HOW TO OPERATE FLOOR LOCKS

Press down to lock. Press down to release. Double non-slip pedals.

Simply press down on larger pedal to set positive lock. (This moves second pedal into top or up position.)

Press down on release pedal and spring quickly returns lock to non-operating position. Both pedals are out in front for safety and ease of operation.

INSTALLATION RECOMMENDATIONS FOR CASTER & FLOOR LOCK.

It is important to select a Caster with an overall height to permit the floor lock to clear the floor in retracted position. The clearance between floor and floor lock rubber pad should be minimal in order to use as much pressure from spring locking device. This will ensure better holding pressure from lock.

No. 31 Top Plate

MODEL NUMBER	EXTENDED HEIGHT	RETRACTED HEIGHT
558	5-5/8"	5"
614	6-1/4"	5-5/8"
634	6-3/4"	6-1/8"
734	7-3/4"	7"

ABRASION RESISTANCE:	The ability of a wheel to resist wear due to use with various floor materials.
AXLE & NUT:	Retains wheels in the yoke.
BOLT HOLE SPACING:	The distance from the centre of one bolt hole to the centre of the next. Where slotted bolt holes are used, two dimensions will be shown.
BORE SIZE:	The axle diameter required for installing a wheel.
CASTER:	One complete unit consisting of all basic caster components: top plate, yoke, wheel, wheel bearing, thread guards, axle nut and washer.
CHEMICAL RESISTANCE:	The degree to which a wheel or tread material is affected when exposed to chemicals.
COMPLETE WHEEL:	The wheel, wheel bearing and related parts, and thread guards.
COMPRESSION SET:	(Also referred to as set or flat spotting.) The effect on a wheel, under load, after a given period of time.
CONDUCTIVE WHEELS:	Measurement of a wheel material's ability to dissipate static electricity (as in anti-static or spark proof wheels).
CROWN:	The Radius molded or machined on the periphery of the wheel to reduce swivelling effort.
DUROMETER (HARDNESS):	SYSTEM for establishing how hard or soft a wheel is. Measured as shore hardness on either the "A" scale for softer tread materials, or the "D" scale for harder tread materials.
DUSTCAP:	Encloses the hardcap to protect the raceway from foreign materials.
DYNAMIC LOAD:	The maximum load on a caster in motion under normal conditions.
ERGONOMICS:	A way of thinking about the design of tools and equipment, the layout of workplaces, and the overall organization of work. The goal of ergonomics is the realization of production and health/safety benefits by fitting the job to the person rather than making the person fit the job.
	
HARDCAP:	The thrust bearing upper raceway.
HUB LENGTH:	The distance from one edge of the hub (axle opening) to the other.
KING BOLT OR RIVET:	Holds swivel components together. A King Bolt is threaded with a nut tightened over the lower end of the swivel. A rivet is either staked through, or orbitally connected to the swivel.
LOAD CAPACITY:	The recommended maximum weight to be carried by a single caster or wheel.
MOBILITY:	Defines the degree of freedom of movement.
OVERALL HEIGHT:	The vertical distance between the top of the caster mounting plate and the bottom of the wheel. When using a stem, this dimension is reduced by the thickness of the top plate.
RESILIENCY:	The amount of spring or bounce in a wheel and the resulting effect on rolling resistance.
RIGID CASTER:	A basic caster unit which does not swivel.
ROLLING RESISTANCE:	The amount of effort required to move a load usually measured in pounds of force.
SHOCK LOAD:	The maximum load a caster can withstand under shock conditions.
SOLID ELASTOMER:	A breakthrough advance in wheel technology, exclusive to Darcor. Solid elastomer wheels are renowned for low rolling resistance, imperviousness to harsh chemicals, and perfect shape retention even after long-term exposure to temperature and load extremes.
STATIC LOAD:	The maximum load on a caster when movement or shock are not present.
SWIVEL CASTER:	A basic caster unit with the addition of a bearing that allows the caster to swivel about a vertical axis.
SWIVEL RACEWAY:	The part of the swivel that contains the bearings.
SWIVEL RADIUS:	The radius required for a caster to swivel freely. Determined by measuring from the centre of the King Bolt to the outside of the wheel.
TEMPERATURE RANGE:	The maximum temperature range that a wheel can operate within for a period of time and still maintain its characteristics.
THREAD GUARDS:	(Also known as string guards.) Keep foreign materials away from axle and bearings.
TOP PLATE OR STEM:	Elements for attaching a caster to a piece of equipment.
TOP PLATE SIZE:	Determined by measuring from one outside edge to the other outside edge.
TREAD WIDTH:	The distance between the outermost edges of the wheel.
WHEEL BEARINGS:	Various types of bearings available.
WHEEL SIZE:	Determined by the diameter of the wheel.
YOKE:	Supports upper and lower raceways. A rigid yoke is either a top plate with legs welded to it or a formed, single-piece top plate/yoke combination.
